

12th Edition of International Conference on Tissue Engineering and Regenerative Medicine. Frankfurt, Germany. May 10-11, 2018

EUROSCICON LLC welcomes you to attend the 12th Edition of International Conference on Tissue Engineering and Regenerative Medicine during May 10-11, 2018 at Frankfurt, Germany. We cordially invite all the participants who are interested in sharing their knowledge and research in the arena of Tissue Engineering and Regenerative Medicine.

Tissue Engineering and Regenerative Medicine Conference is to ameliorate the knowledge, awareness, and education on Tissue Engineering and Regenerative Medicine leading to the discovery of tissue engineering and regenerative therapies which aid to alleviate the human disease as it is the most significant emerging technology in the eyes of Medical, Biotechnology, Pharmaceuticals and Academia. Tissue Science 2018 is an excellent opportunity for the delegates from Universities and Institutes to interact with the world class Scientists.

Tissue Engineering Conferences will provide a perfect platform to all the Doctors, Biotechnologist, Researchers Business Delegates and Scientists to approach and deliver all the attendees about the latest scientific advancements on the respective sphere.

Regenerative Medicine Conferences strategic astuteness is to be an event for bringing together Scientists, Physicians, International mix of leading Universities, Cell and Gene Therapy physicians, Regenerative medicine physicians, Regenerative medicine Associations and Societies, Stem Cell Associations and Societies, Allied health professionals in the fields of Biomedical Engineering, Bioinformatics, haematology, oncology, neurology, Rehabilitation and internal medicine, Training Institutes, Business Entrepreneurs pursuing their work in the field and related. Tissue Engineering Institutions to transform the practice of medicine by incorporating the use of genetic

therapies to control and cure human disease.

This two-day Tissue Science Event will address key issues concerning tissue engineering and regenerative Medicine in the broader context of curing genetic disorder. Organized around daily themes, the Conference focuses on moving from present knowledge to future solutions. Tissue Therapy 2018 welcomes you all to stay engaged, proactive and help us to shape the future of Tissue Engineering and Regenerative Medicine.
