

## **World Congress on Embryology and In vitro Fertilization. Chicago, USA. November 2-3, 2017**

World Congress on Embryology and In vitro Fertilization focuses on human embryology and aims to provide an up-to-date source of information on a variety of selected topics. The conference will be organized on the theme of Exploring the Novel Research & Techniques in Reproductive Health, this conference is going to be held during November 2-3, 2017 at Chicago, USA. Embryology is a branch of science deals with the morphological aspects of organismal development. The genomic and molecular revolution of the second half of the 20th century, together with the classic descriptive aspects of science that allowed greater integration in our understanding in many developmental events.

Through such integration, modern embryology helps to provide practical knowledge that is applied to assisted reproduction, stem cell therapy, birth defects, fetal surgery and other fields. The conference organized into three sections, namely: 1) Gametes and infertility, 2) Implantation, placentation and early birth, and 3) Prospects of embryology. International conference on Embryology will offer an exciting, & wide range of scientific program designed to engage high profile scientific international on topics of importance related to the Embryology. This conference will be the perfect occasion for the international and Indian experts to share their leading edge knowledge on innovation and technology balanced by critically important insight into their practical application. The conference will also feature over scientific poster presentations, a large trade exhibition and a packed social program providing an excellent opportunity to learn, network and exchange ideas. This conference focus interest to all fertility and reproductive experts including Andrologists, embryologists, Consultants in reproductive medicine Counselors, Gynecologists, Reproductive biologists, Reproductive nurses, biology and medical students, clinical embryologists, laboratory researchers and anyone who wishes to know more about recent advances embryology.

## **Scientific Session:**

Fertility and conception  
Placentation  
Implantation  
Early Birth  
Embryo-Lab Quality  
Cleavage Stage Embryo  
Epididymis and Infertility  
Artificial Insemination  
IVF Treatment  
Fertility Surgery  
In vitro Maturation Techniques and many more.....

## **Why Chicago, USA?**

Chicago is among the largest cities in the U.S. Famed for its bold architecture, the population of the city is rank 3rd largest city in USA. Chicago had the third largest gross metropolitan product in the United States at US \$571 billion. With over 2.7 million residents, it is the most populous city in the state of Illinois and the Midwest. Chicago is the third most populous city in the United States. The city is an international hub for finance, commerce, industry, technology, telecommunications, and transportation; with O'Hare International Airport being the busiest airport in the world. Chicago is a major transportation hub in the United States. It is an important component in global distribution, as it is the third-largest inter-modal port in the world after Hong Kong and Singapore.
