

## Protein Discovery Summit 2016

**Organizer:** GTCbio

**Start date:** December 5<sup>th</sup>, 2016    **End date:** December 7<sup>th</sup>, 2016

We invite you to attend the **Protein Discovery Summit** to be held on **December 5-7, 2016** in **Boston, MA**. The Protein Discovery Summit is the ideal venue to network with your fellow researchers, providing access to over 125 presentations from leading industrial and academic experts and will feature research findings, case studies, and technology advancements.

This summit will discuss various areas in the field of protein science. New updates will be given in areas such as protein-protein interactions in drug designs, advances in antibody drug conjugates, bispecific and multispecific antibodies, the expression of difficult proteins, and the purification and characterization of proteins. Don't miss important insights on how to overcome the many hurdles that are associated with the production of proteins.

The Protein Discovery Summit will answer exciting key questions for the successful development of new drugs and targeted kinase signaling. Join this multi-disciplinary forum and network with colleagues from industry and academia to discuss the methods and tools that will ensure the most efficient and accurate optimization of proteins.
